

Mock Iteration V3

This iteration starts to get closer to Google Material Design specifications and principles, but we encountered issues with passing color contrast testing for 508 and accessibility. Also during user testing we found that users didn't feel excited about the overall design with the lack of photography, and dark color scheme.

Additional notes for refinement

- We need to show empty states when data is not present
- Add photography to showcase the use case of the application in real time
- Move filters to reviews tab
- Refer to Google Material Design to choose new color palette that meets 508/accessibility standards
- Replace icons, please refer to Google Material icon collection
- The form on the reviews page is distracting from the focus of reading reviews. Keep the form access within the "Review Button"
- Create mocks for mobile experience

Tips

- Starts relieving pain in 30 to 60 minutes.
- Take it with a meal or a snack to prevent upset stomach.
- Can make you bruise or bleed more easily and it can also cause stomach ulcers.
- Don't take it with other blood thinners, like aspirin, unless your doctor tells you it's safe.
- Can hurt your kidneys, so don't use it if you have a history of kidney problems.

Advil, Motrin IB (Ibuprofen)

Description: This drug is a type of NSAIDs i.e. non steroidal anti inflammatory drugs. It works best on inflammation causing substances in a same way it is used for treating arthritis or any injury. This drug is not allowed to be used for longer time periods unless the inflammation doesn't disappear. If this drug is consumed for longer time periods, it can lead to serious side effects like bleeding, stomach upset, heart problems and kidney problems. It is highly advised not to consume overdose of this drug as it can trigger serious consequences.
